PROFESSIONAL SUMMARY

Data Analyst and Python Developer with hands-on experience across the analytics pipeline — data collection, preprocessing, EDA, statistical analysis, and ML model development. Skilled in building interactive dashboards and automating data pipelines with Python, SQL, Power BI, and Excel to deliver actionable business insights.

TECHNICAL SKILLS

- **Programming & Databases:** Python (Advanced), SQL, RDBMS, Query Optimization, SQL Joins, CTEs, Window Functions
- **Data Analysis:** Pandas, NumPy, Excel, Data Cleaning, Feature Engineering, EDA, Statistical Analysis
- **Visualization & BI:** Power BI, DAX, Power Query, Matplotlib, Seaborn, Dashboard Design, KPI Reporting, Data Storytelling
- **Data Engineering:** ETL, Data Warehousing, Data Modeling, Star Schema, Snowflake
- **Machine Learning:** Regression, Classification, Clustering, Random Forest, Model Evaluation
- **Tools:** Git, GitHub, Streamlit, Jupyter Notebook, Google Colab, Katalon Studio

PROFESSIONAL EXPERIENCE

Data Analytics with Python Intern

Jan 2026 – May 2026

Qspiders (A Unit of Test Yantra Software Solutions (India) Pvt. Ltd.)

- Completed a 4-month intensive internship applying Python, SQL, EDA, statistical analysis, and machine learning to real-world business datasets, strengthening end-to-end data analytics capability.
- Built interactive Power BI, Matplotlib, and Seaborn dashboards to analyze customer and sales data across 10,000+ records, supporting data-driven decision-making for stakeholders.
- Automated data cleaning and preprocessing workflows using Python (Pandas, NumPy), reducing manual effort and improving data pipeline efficiency.

Virtual Experience Program – Data Visualisation

Aug 2025 – Oct 2025

Tata Group via Forage

- Completed an industry-led program on business scenario framing, visual design, and communicating data insights to senior management.
- Applied Power BI and analytical frameworks to translate structured datasets into executive-level reports and KPI dashboards.

PROJECTS

Customer Churn Analysis and Prediction System 🔗 Python, Power BI, Machine Learning, Streamlit

- Built a Random Forest churn prediction model on 20,000 telecom customer records, achieving 76% accuracy and 61% F1-score (67% precision, 56% recall), flagging 1,339 high-risk customers representing \$18.95M in revenue at risk.
- Identified month-to-month contract holders and electronic-check users as the highest-churn segments through Power BI analysis of customer demographics, tenure, and payment behavior.
- Built an interactive Power BI dashboard and a Streamlit app for real-time churn prediction, tested locally.

E-Commerce Sales Analytics – ETL Pipeline 🔗 Python, Snowflake, SQL, Power BI, DAX, Snowpipe

- Designed and built an end-to-end ETL pipeline on e-commerce transaction data, implementing a Bronze–Silver–Gold (Medallion) architecture in Snowflake with Streams and Tasks for automated, incremental data transformation.
- Modeled Fact and Dimension tables (Star Schema) and built a Power BI dashboard covering 1.69M in total sales across 1,907 orders and 2.17M gross revenue, with trend, category, payment method, and country-level breakdowns.
- Automated the full pipeline from raw data ingestion through transformation to reporting, eliminating manual data prep between pipeline stages.

Movie Content & Popularity Analysis 🔗 Python, Pandas, Matplotlib, Seaborn

- Performed EDA on a Kaggle dataset of 6,000+ movie titles, finding Drama as the most frequent genre (11%+ share across 10+ categories) and 2020 as the peak year for content releases.
- Analyzed popularity patterns across genres, finding Drama also led in audience popularity (11.5%+ of high-popularity titles), and identified the highest- and lowest-ranked titles by popularity.
- Applied statistical hypothesis testing to validate genre and popularity trends, translating raw metadata into content-strategy-relevant insights.

EDUCATION

Bachelor of Engineering – Computer Engineering

Dec 2022 – May 2026

Jain College of Engineering & Technology — CGPA: 8.7 / 10

Class XII – CBSE — 90.80% (2022) | Class X – State Board — 76.17% (2020)

CERTIFICATIONS & TRAINING

- [Software Conceptual Design](#) – NPTEL (IIT)
- [Data Visualisation: Empowering Business with Effective Insights](#) – Tata Group via Forage
- Data Analytics with Python Internship Completion Certificate – Qspiders, Test Yantra Software Solutions

ADDITIONAL INFORMATION

Languages: English (Professional), Kannada, Hindi | Interests: Cricket, Chess
