Professional Summary

Data Analyst and Python Developer with hands-on experience across the analytics pipeline — data collection, preprocessing, EDA, statistical analysis, and ML model development. Skilled in building interactive dashboards and automating data pipelines with Python, SQL, Power BI, and Excel to deliver actionable business insights. Seeking a Data Analytics role at a product-based company or MNC.

Technical Skills

- **Programming & Databases:** Python (Advanced), SQL, RDBMS, Query Optimization
- **Data Analysis:** Pandas, NumPy, Excel, Data Cleaning, Feature Engineering, EDA, Statistical Analysis
- **Visualization & BI:** Power BI, Matplotlib, Seaborn, Dashboard Design, KPI Reporting, Data Storytelling
- **Machine Learning:** Regression, Classification, Clustering, Random Forest, Model Evaluation
- **Tools:** Git, GitHub, Streamlit, Jupyter Notebook, Google Colab, Katalon Studio

Professional Experience

Data Analytics with Python Intern

Jan 2026 – May 2026

Qspiders (A Unit of Test Yantra Software Solutions (India) Pvt. Ltd.)

- Completed a 4-month intensive internship applying Python, SQL, EDA, statistical analysis, and machine learning to real-world business datasets, strengthening end-to-end data analytics capability.
- Built interactive Power BI, Matplotlib, and Seaborn dashboards to analyze customer and sales data across 10,000+ records, supporting data-driven decision-making for stakeholders.
- Automated data cleaning and preprocessing workflows using Python (Pandas, NumPy), reducing manual effort and improving data pipeline efficiency.

Virtual Experience Program – Data Visualisation

Aug 2025 – Oct 2025

Tata Group via Forage

- Completed an industry-led program on business scenario framing, visual design, and communicating data insights to senior management.
- Applied Power BI and analytical frameworks to translate structured datasets into executive-level reports and KPI dashboards.

Projects

Customer Churn Analysis and Prediction System

Python, Power BI, Machine Learning, Streamlit

- Built a Random Forest-based churn prediction model on telecom customer data, performing data preprocessing, feature engineering, and model evaluation using Accuracy, Confusion Matrix, Precision, Recall, and F1-Score.
- Designed interactive Power BI dashboards and developed a Streamlit app for real-time churn prediction, enabling self-service analytics for stakeholders.

E-Commerce Sales Analytics – ETL Pipeline

Python, Snowflake, SQL, Power BI, DAX, Snowpipe

- Built an end-to-end ETL pipeline using Python, Snowflake, SQL, and Power BI, implementing a Bronze–Silver–Gold architecture with Streams, Tasks, and Pipes for automated, incremental data processing.
- Designed Fact & Dimension models and interactive Power BI dashboards with DAX measures for Sales, Customer, and Product analytics, surfacing revenue and behavior trends.

Netflix Content Data Analysis

Python, Pandas, Matplotlib, Seaborn

- Collected, cleaned, and performed EDA on a Netflix content dataset, identifying content trends, genre distribution, and release patterns across 6,000+ titles using Matplotlib and Seaborn visualizations.
- Applied statistical and hypothesis-testing approaches to validate data-driven hypotheses on content consumption patterns, demonstrating strong quantitative analytical skills.

Education

Bachelor of Engineering – Computer Engineering

Dec 2022 – May 2026

Jain College of Engineering & Technology — CGPA: 8.7 / 10

Class XII – CBSE, Ajeeth PU College — 90.80%

2022

Class X – State Board, Satya Sai School, Navangar — 76.17%

2020

Certifications & Training

- **Data Visualisation: Empowering Business with Effective Insights** – Tata Group via Forage
- **Data Analytics with Python Internship Completion Certificate** – Qspiders, Test Yantra Software Solutions

Additional Information

Languages: English (Professional), Kannada, Hindi | **Interests:** Cricket, Chess
